This is strictly a Wholesale Catalog for Dealers and please order in multiples of 25 or more; send orders on your stationery.

Terms—Cash with order, free packing. We prefer to ship by Express or Truck Freight; please mention nearest Express Station or the best Truck Route.

All items listed are true to name; if in doubt as to the plants, send a sample order of \$1.00, mention the items interested in and we will mail you enough samples for your inspection.

All items in Flats and R. C. are in the Greenhouse and will be shipped in April or after freezing weather. All beds and field grown plants are outside and can ship anytime you wish them. Please tell us when you wish material shipped.

All stock is grown in well rotted manure, peat moss and soil, and fed with liquid fertilizer. Real large root balls.

During the summer of 1955 we will have flats of Azaleas, Rhodoendrons, Kalmia, etc., from Seed. These are once transplanted in Flats in Peat Moss and we really have a lot of customers who come to the Nursery during the summer months and pick these plants up, so if you want to make some money in the next few years buy some of these.

Protect Your Landscape Picture

It Increases the Value of
Your Home

Dormant or Winter Spraying should be done before the leaves or new growth appears, as strong sprays injure new growth.

Feeding by fertilizing as Plants need food to retain their beauty and normal growth.

Trimming or pruning will keep your Plants from becoming too large, too weak or straggly in appearance, also remove the dead or diseased parts of each plant where fungus and insects thrive.

Will be glad to give an estimate on any of the above if you are not able to do it yourself or have the proper equipment for the work, so call Hilltop 33555 and we will send a representative to see you.

If you can do it yourself we can supply the necessary materials for the work and we would advise that you contact your County Agent as to the time and he will be glad to send you circulars or advise you as to what should be done to keep your Landscape Picture.

Our Planting and Delivery Service is available at all times and should you wish to revise your Plantings or move some of your Plants call us and we can furnish new Materials and also remove undesirable Plants but try to do so as soon as you can; as stated above everyone is really busy in the Spring, so do it now.

Thirty years of experience, constant study and keeping in contact with all the problems involved, we remain
